Details about the project:
Saaksharath's mission is to provide the general public with knowledge about the literacy rates in various states of India through means of a website. This website will include a portal for the admin where the administrator can edit, manipulate and update the contents of the webpage. Additionally, this will also include the details of different programs conducted by the organisers to get people educated, which creates awareness among the public. There are also facilities to register online for the workshops conducted by the organisers. Moreover, there is proficiency to generate and compare literacy rates of the different states. All of this data can then be organised into pie charts and tables for efficient reading which can then be downloaded if necessary. Not only that, but this webpage will also contain personal information about the committee who are organising and funding for all of these projects in different parts of India. There will also be a separate section where interested people can donate to the organisation to help improve the literacy rate. To conclude, this website will have all the scattered information about the literacy mission of different states put into one page which can be easily understood by any common man.
